

ENERGY GUARD™

ENERGY FLAPS

Flaps that deflect spray, reduce drag, and improve rear visibility. No compromises.

 2-Year Limited Warranty  MVTS Certified™ Fuel Savings  Made in the USA

Why Fleets Choose Energy Flaps

Improved Road Safety

Angled louvers direct spray downward for better visibility

Fuel Efficiency Gains

Certified aerodynamic savings vs. solid flaps

3-5X Longer Lasting

Impact-modified polymer resists flex and temperature extremes

Custom Branding

Fleet logos molded into the flap for lasting visibility

Certified Fuel Savings

Fuel Economy Improvement: 3.6%

Gallons Saved: 4.2 gal / 1,000 mi

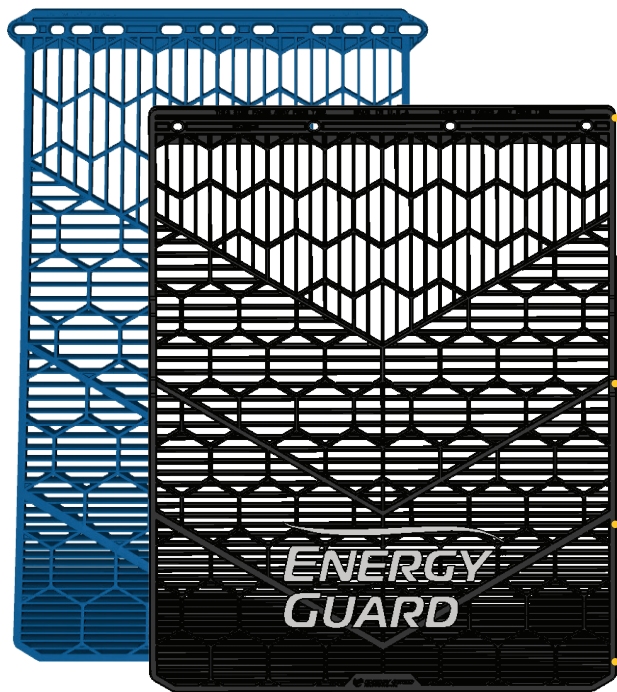

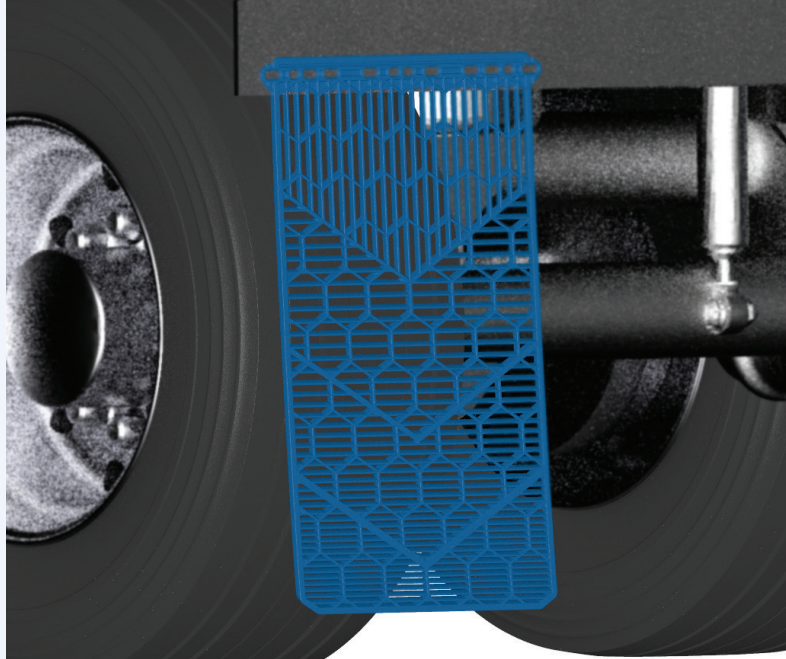

MVTS Certified™ fuel savings at 65 MPH on 28' double trailers.

Actual results may vary based on configuration and operating conditions.

911 SSA 0725

Built to Adapt. Built to Last.

- ✓ Replaces standard mud flaps with aerodynamic gains
- ✓ Optimized for both 28' and 53' applications
- ✓ Directional mounting holes eliminate guesswork

Many sizes available

- 18" x 30"
- 24" x 24"
- 24" x 28"
- 24" x 30"

Ideal for dry vans, reefers, and open deck trailers

Customizable logo mud flaps available

Standard available in black (other colors available)

¹ Estimated fuel savings are based on a commissioned third-party test conducted by Mesilla Valley Transportation Solutions (MVTs) using their Certified™ fuel economy testing procedure in June 2022. Testing was performed on a modern Class-8 truck with two 28' dry van trailers at 65 mph, comparing Energy Guard Mud Flaps to solid mud flaps installed in all eight positions. Actual on-road results may vary.
